# FAQ

## ※ Have difficulties when web license activation?

### 1. Check the Internet connection

→ A Web license [is authorized based on the internet](#), so it can't be used in environment where the internet connection is not supported.

### 2. Check misspelling in entered Protection Key (PKID)

→ [Copy and Paste](#) Protection Key(PKID) which is sent to your email. It helps to prevent from mistyping PKID. But, please be careful [to not contain blanks in front of and back](#) when PKID is copied.

### 3. Check if PID is selected correctly in 'Lock option' window

This is one of the most frequently occurred errors. To avoid the error, it is required [to reset to correct Product ID \(PID\) which is sent to your email](#) by following the license activation guide in the cases as following :

- 1) If you have several web licenses
- 2) If you receive a new web license after an existing license is expired.

Furthermore, run a program after every options become being activated by clicking [Select All] if all of them in your license aren't checked on.
